1. 
Top (label above heading):

DAK SECURITY LABS

Heading:

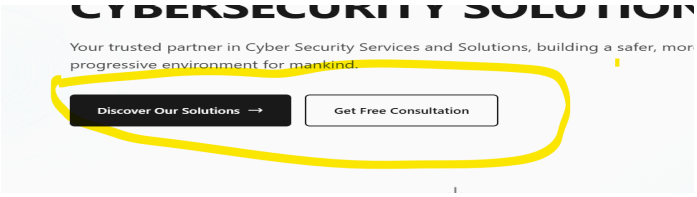
Your Systems | Your Data | Your Responsibility

Subtext:

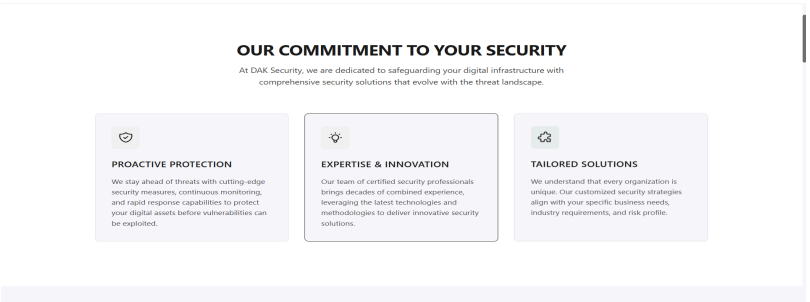
Secured with discipline, integrity, and military-grade cybersecurity practices that you can Trust.

---

2. Remove these highlighted buttons.



3.



Section Title:

Our Work Ethics

Content:

- We treat every system with the same level of care and responsibility – no matter the size or type of organisation.
- We first understand how your systems work, where the risks are, and what needs to be protected.
- Then we apply structured and disciplined security practices to reduce those risks and strengthen your systems.
- Everything we do is clear, documented, and aligned with how your organisation operates.

⚠️ DESIGN INSTRUCTION

- Heading slightly smaller than hero headings
- Left aligned
- Keep content width narrow
- No boxes / cards / icons
- Add slight spacing between paragraphs

4.

Section Title:

How We Secure Your Systems

Subtext:

A structured approach to identifying, understanding, and securing your whole systems.

Framework:

DETECT

We identify risks across your systems, infrastructure, and processes.

ANALYZE

We understand how these risks behave and how they affect your systems together.

KINETIC

We take disciplined action to secure and strengthen your systems as one integrated environment.

🎨 DESIGN INSTRUCTIONS

Layout:

- 3 sections in a **horizontal row (desktop)**
- Stack vertically on mobile
- Equal spacing between all three

Text Styling:

- DETECT / ANALYZE / KINETIC → ALL CAPS
- Slightly bold (not heavy)
- Content below each → max 2 lines

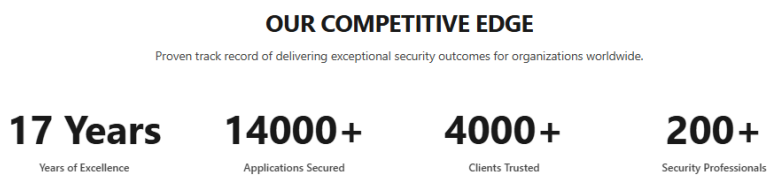
Visual Style:

- No cards
- No shadows
- No icons (or keep extremely minimal if already present)
- Clean text-only layout

Alignment:

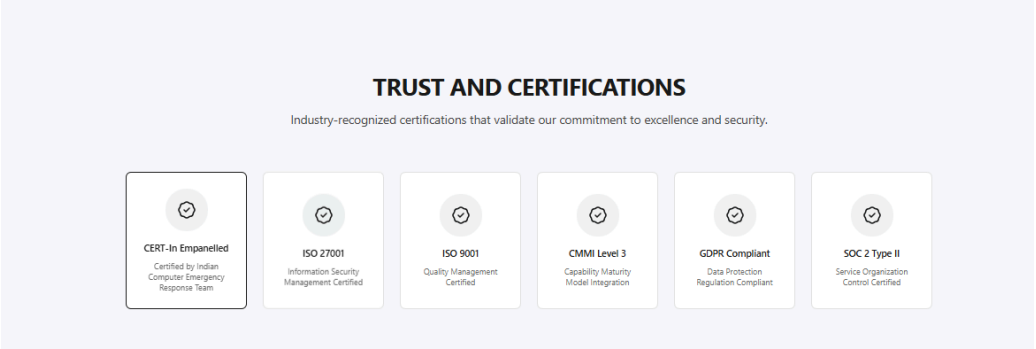
- Center aligned OR left aligned (keep consistent)
- Maintain equal width for all 3 blocks

5.



Remove this completely

6.



Section Title:

Experience and Capability

Subtext:

Your systems are handled by seasoned professionals with certified expertise and experience in critical and sensitive environments.

Block 1

Certified Expertise

- CISSP, CISM, CISA, ISO 27001 and related security standards
- Defence-oriented cyber intelligence practices
- Digital forensics and incident investigation
- Security operations and risk assessment

Block 2

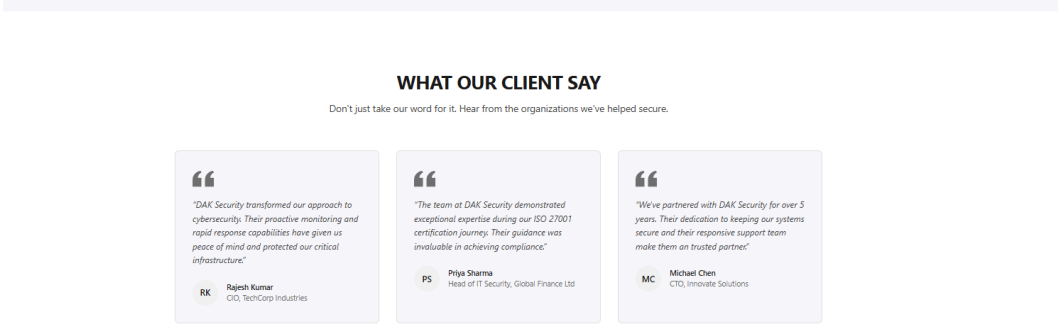
Applicable Across Critical Sectors

- Defence, law enforcement, and intelligence environments
- Financial systems, fintech, and banking infrastructure
- Government, public sector, and regulatory systems
- Healthcare, legal, and sensitive data ecosystems
- Enterprise, industrial, and operational technology environments

⚠️ DESIGN INSTRUCTION

- Keep bullets tight (1 line each)
- Do not wrap into paragraphs
- Maintain equal height of both blocks

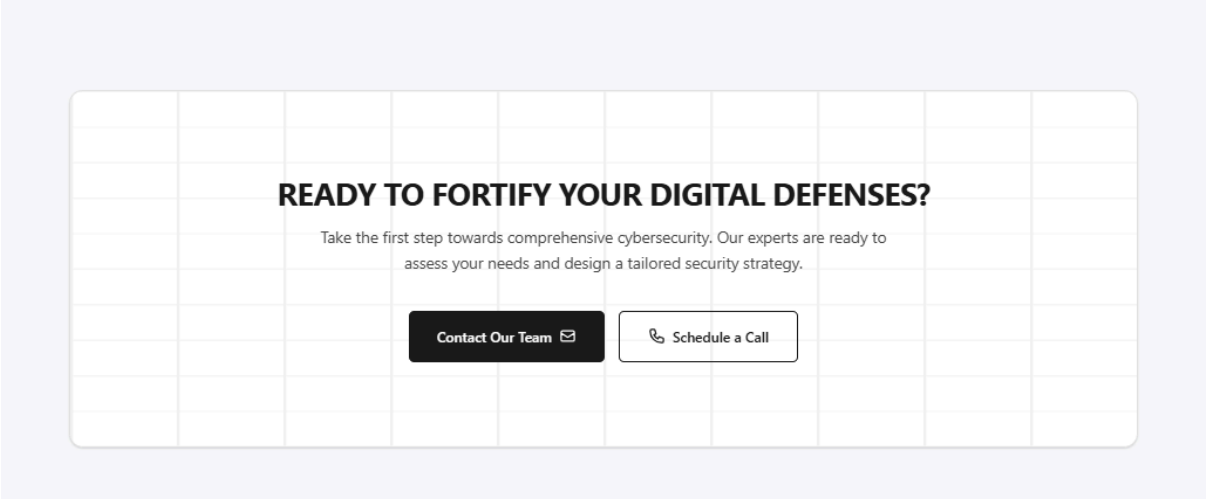
7



.

Remove this section completely.

8.



Heading:

Do You Need Our Help in Securing Your Systems?

Primary Action:

Yes, We Do.

⚠️ DESIGN INSTRUCTION (VERY IMPORTANT)

Layout:

- Center aligned (recommended for this section)
- Keep it visually isolated (good spacing above & below)

Button:

- Single button only

9.

Form Section

Form Title:

Let’s Discuss

Fields

1. Name / Organisation

2. Email

3. Phone Number

4. Location *(Mandatory)*

5. Domain / Category *(Optional Dropdown)*

Options:

- **Government / Public Sector**
- **Defence / Law Enforcement**
- **Banking / Financial Services**
- **Healthcare**
- **Enterprise / Corporate**
- **Industrial / Infrastructure**
- **Technology / IT**
- **Other**

6. Interested In *(Optional Dropdown)*

Options:

- **Security Services**
- **Security Products**
- **Training**
- **Other**

7. Message

Placeholder:
Briefly describe what you need help with

8. 🔘 Submit Button: Send

⚠️ **DESIGN INSTRUCTIONS (FINAL)**

Layout:

- **Two-column (desktop)**
  - **Left → Contact details**
  - **Right → Form**
- **Stack on mobile**

Style:

- No icons
- No shadows
- No cards
- Clean text layout

Spacing:

- Compact but breathable
- Keep width controlled

Interaction:

- Email clickable
- Phone clickable

Page Title:

Services

Opening Line:

We work on your systems to identify risks, test security, fix issues, and keep everything protected over time.

🔻 DETECT

Understand where your system is exposed

Understand Your System

See how your system is built today and where risks may exist.

- Applications (web, mobile, APIs)
- Network and infrastructure
- System configurations
- Known vulnerabilities and weak points

Find What Is Exposed

Check what parts of your system are visible and accessible.

- External attack surface
- Open ports and running services
- Internet-facing assets
- Misconfigured exposures

ANALYZE

Test your system and understand what can go wrong

Test Your Security

Test your system the way an attacker would.

- VAPT (Vulnerability Assessment & Penetration Testing)
- Internal and external testing
- Application and network testing
- Red team exercises

Understand Incidents

Understand what has happened and how it affected your system.

- Incident investigation
- Log and activity analysis
- Root cause identification

Investigate Systems & Data (Digital Forensics)

Work with systems and data when investigation or evidence is required.

- Disk and system forensics
- Mobile forensics
- Data recovery
- Evidence handling

KINETIC

Fix issues. Strengthen your system. Keep it secure

Fix and Strengthen Your System

Fix identified issues and improve how your system is secured.

- **System hardening**
- **Secure configurations**
- **Security control implementation**
- **Alignment across systems**

Monitor and Respond (SOC)

Stay aware of what is happening in your system and respond when needed.

- **SOC (Security Operations Center) setup and support**
- **Monitoring and threat detection**
- **Incident response**
- **Threat hunting**

Meet Standards and Requirements (ISO, Regulatory)

Ensure your system meets required security standards.

- **ISO 27001 and related standards**
- **Regulatory requirements (RBI, DPDP, etc.)**
- **Risk assessment**
- **Documentation and audit readiness**

Handle Special Systems

Secure systems that need deeper attention.

- **IoT and connected devices**
- **OT / SCADA systems**
- **Surveillance systems**

Prepare Your Team

Make sure your team knows how to respond.

- **Security awareness**
- **Phishing simulations**
- **Incident response drills**

🎨 FINAL DESIGN INSTRUCTIONS (GIVE THIS DIRECTLY)

Layout

- Page width: narrow (reading format, not full width)
- Vertical flow (no grid of cards)

Section Hierarchy

1. Page Title
2. Opening Line
3. Detect
4. Analyze
5. Kinetic

Section Styling

Main Section (Detect / Analyze / Kinetic):

- Bold
- Slightly larger
- Clear spacing above

Subheading (1-line statement):

- Smaller than title
- Slightly muted color

Blocks:

Each block:

- Title (bold)
- One-line explanation
- Bullet list

Spacing

- Large spacing between sections
- Medium spacing between blocks
- Tight spacing in bullet lists

DO

- Keep everything left aligned
- Keep text clean
- Use thin dividers if needed
- Maintain consistent spacing

DO NOT

- No icons
- No colorful UI
- No shadows
- No “cards”
- No animations
- No “key benefits”

Optional Interaction

If using accordion:

- Closed → show title + 1 line
- Open → show bullets
